

British  
Cryogenics  
Council

# BCC Advanced Cryogenics Course 2023

3 day  
course

Tue 18 - Thur 20 July 2023  
The Cosener's House, Abingdon

The course will provide attendees with detailed explorations of a range of topics in cryogenic engineering including:

- **Cryostat Operation**
- **Hydrogen**
- **Instrumentation**
- **Software**
- **Industrial Scale Cryogenics**
- **Helium Production & Storage**
- **Quantum Technologies**

#### Target audience:

The course is a follow-on from the BCC Introductory Course, with experts presenting deep dives into a broad range of topics over three days. The course is aimed at engineers and scientists with some experience of low temperature systems.

#### Registration:

Registration is **NOW LIVE**, with the limited places available allocated on a first-come first-serve basis. Register now to avoid disappointment.
